FLAPSOLUTION – FOR INDIVIDUALISED PACKAGING

WRAP lid

The carton lid arches over round fruit to form a stable X-shape without compromising product visibility.

Ideal for relatively robust fruit and vegetables, even with varying product sizes/packaging volumes (+/- 10 mm), such as apples, citrus fruits or kiwi (for 4, 6 or 8 fruits).

FLAT® lid

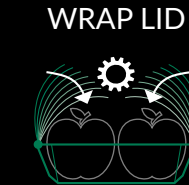

The carton lid closes the tray flat, allowing free filling. Creative shapes and individual lid punching are possible. Ideal for fruit and vegetables with a soft consistency, delicate skin and variable size/shape, such as cherries, tomatoes, mushrooms or potatoes.

THE CLOSING TECHNOLOGY FOR EVERY NEED

Option ZIPP-Closing

A variety of tray types with flaps are closed using interlocking technology

Option GLUE-Closing

Flaps are pre-glued on the side without risk of contamination and closed flexibly

Option STICK-Closing

Automatic tray closure system with labelling

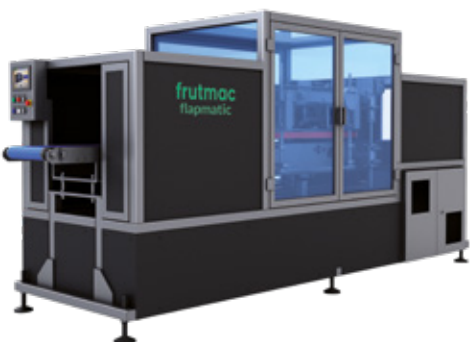

SIDEFLAP LID
